

Versatile Dancer System

A dancer system is required equipment on any REELEX packaging line, as precise tension control is essential to producing quality REELEX coils. Unlike previous dancer systems, the Universal Dancer Accumulator (UDA), is a modular unit which can be customized depending on demands for input/output heights, direction, motors, counters and more.

The UDA may also be altered in the field, allowing the unit to accommodate variations in line direction, or changes in products or packaging.

Available Options

The standard UDA comes as a base model with 9-inch sheaves, no counter, and no motor. The 9-inch (229mm) sheaves are suitable for heavier constructions such as coaxial cable, while a 15-inch (381mm) sheave upgrade is recommended for category cable and fiber optics. The 15-inch sheaves are engineered by REELEX Packaging Solutions especially for REELEX coiling, as their light weight design drastically reduces the amount of rotational inertia in the line.

Other options include one or four-pulse counters, and one or two-horsepower motors. The motors assist in pulling cable from the accumulator in online situations, and are not normally required in rewind-line packaging configurations.

Recommended Systems

For online REELEX packaging (D-1500 and D-2000), a UDA with motor is recommended to pull product from the accumulator system. For rewind-line configurations, a motor is not required, as the motorized payoff feeds product into the UDA. For sensitive cable constructions such as Category 6, 6A, 6E or fiber optics, the 15-inch sheave upgrade is recommended.

Pricing and information

UDA is sold as a base unit with 9-inch sheaves. Optional equipment is listed below. Please contact REELEX for rental pricing.

FEATURES AND OPTIONS	PRICE - BASE
Fully adaptable in the field to accommodate changes in line direction, line configuration, input/output heights and more	Base Price: \$6,650.00 USD
Counters: 1 or 4-pulse counters are available	
Motors: May be equipped with 1 or 2 horsepower motors for pulling cable from an accumulator system	
Sheaves: Standard 9-inch metal sheaves, 15-inch optional	
	PRICE - OPTIONS
	Counter: \$1,650.00
	15-Inch Sheaves: \$2,050.00
	1 HP Motor: \$2,400.00
	2 HP Motor: \$2,790.00

TERMS AND CONDITIONS: Net 30 Days. All prices F.O.B. Patterson, NY USA. All prices quoted in US Dollars. Prices subject to change without notice.
