

REELEX PACKAGING PROGRAM

052208

Overview and Instructions

About the Program

Welcome to the REELEX Packaging Program. This program is designed to assist in determining recommended machine settings used to make an ideal REELEX coil. This program will also provide the approximate coil diameter produced by a set of given settings which can be used in package design. Please keep in mind that this program uses mathematical formulas and thus should only be used as a guide. Real world conditions and product characteristics may render the provided settings and coil diameters incorrect.

Installation and Use

1. Double-Click on "REELEX Packaging Program Install.exe"
2. Follow the on screen instructions to install onto your hard drive.
3. Once installation is complete, open the "REELEX" folder on your hard drive and click on "reelex packaging.exe"
4. Enter the required information and click on "Continue". This will give your recommended minimum and maximum gain settings.
5. To learn more, click the "Packaging Guidelines" button.
6. To view coil diameters, click on the "Click for a list of some average gains and their corresponding coil diameters."
